The room was very familiar; the scene predictable—we’d been there before but had never been there. A group of NSRF National Facilitators were working, eating, talking, and planning, in critical friendship. We were in Atlanta at the recent Center of Activity Summit, but we could have been anywhere and the thirty or so assembled National Facilitators could have been a very different bunch. But we were there, in Atlanta, to once again take up the conversation of standards and guidelines for National Facilitators, and this time we made real progress.

We met for a day and a half following up on a day-long Accountability Council (AC) meeting where we had gained some clarity around the purposes of our standards—we did not concern ourselves with the technicalities of this or that standard, nor how it would be measured or even what the metrics would be. Instead, from the AC meeting through the summit, we crafted our work in terms of what National Facilitators DO and therefore what they KNOW, as a result of NSRF’s work. We were also very clear in our process—we were not deciding anything; we were working together to clarify our thinking and to propose direction to the National Center as we continue to hone our language and articulate our practice.

We have pages and pages of notes, dutifully typed up by work-study students who know little of our work. We have lots of ideas and we emerged from the summit with five broad themes—standards—to guide us as we continue to tune our language as we begin a process for public review of each National Facilitator’s practice. I offer a reflection on each of the proposed standards, not as definitive, but as representative of the deliberations we are considering as we continue our journey as a national organization.

Standard #1 – Skills: I believe this standard begins to address the basic question, what do National Facilitators DO and therefore what do they KNOW? This question turns the typical educational question of what children should know and be able to do on its head, and is borrowed from the essential question asked by Big Picture Company schools. It assumes National Facilitators have some practice in common, that we do certain things—not necessarily particularly—but in general and that as a result of our collective doing we are amassing a knowledge base that is identifiable, reportable, and replicable. Collectively, we generously throw around the best practices language, but in our case, over the years, we have individually and collectively honed our practice toward being able to collectively know. We know about our practice, what works and what doesn’t, how it gets received and why, and in the end, we share a deep belief that to improve student learning and achievement we must learn together as adults. We agree that it takes certain skills, though varied, to do our work and that we can and should articulate those skills as we seek feedback on our practice.

Standard #2 – Addressing Issues Related to Equity: Our mission statement says that as an organization we have a commitment to fostering educational and social equity. Those of us who were around for the crafting of this language years ago remember the honest and sometimes tough conversations we had about including this statement in our mission. Over the years we have struggled with the construct of equity. (continued on page 9)
In this issue
Debbie Bambino, Pennsylvania

In this issue of Connections, our director, Steven Strull, shares news of our recent Centers’ Summit and the launch of our new Accountability Council in his report. As we take steps toward long-term sustainability, we are making the road of our mission by walking it together. Read Steven’s analysis of proposed standards for national facilitators that grow out of what we “do” and what we “know” about our work in support of students.

Pedro Bermudez and Linda Emm, two of our Southern Florida hosts for this year’s Winter Meeting, bring us up to date on the state of their work in their Center’s report and welcome us to their state. In addition, in our Living History feature, Linda shares her history as a coach and her hopes and fears about the future of their work.

This issue’s Students at the Center finds Peggy Silva from Souhegan High sharing her writing and soliciting student feedback around a recent experience of her own. Peggy tells us about the impact of students, the power of the Circle in Community Conversations about Race, and the launch of our new Accountability Council.

Kevin Fahey, our Research Director, shares the story of two research studies about the initiation and impact of CFGs for administrators, raising still more questions about the ways we structure interventions and reforms.

Kim Carter and Camilla Greene offer us an eye on their individual experiences occurring in tandem, as colleagues across difference engaged in the ongoing online book chat about the text Conversations about Race by Glenn Singleton and Curtis Linton.

Diana Watson shares her perspective about the book “she keeps returning to,” in her review of The New Meaning of Educational Change by Michael Fullan.

Finally, Dave Schmid and Linda Fiorella offer us a glimpse of the power of the circle and their use of protocols and collaborative structures in support of the Juneau community’s struggle to confront educational inequities and design new high schools that are student-centered, in their Protocols in Practice piece, The Power of the Circle in Community Conversations about Equity.

Connections is a journal of the National School Reform Faculty, a division of Harmony Education Center. Published three times per year, it provides a forum for CFG Coaches and other reflective educators to share their practice.

Editorial Board: Debbie Bambino, Sarah Childers, Camilla Greene and Greg Peters

If you have any feedback or are interested in contributing to Connections, contact us at 812.330.2702 or dbambino@earthlink.net

1. Describe the learning environment in a high school that you do not want to see.
2. Describe the learning environment in a high school that you want to see.
3. Describe your student when he/she graduates from high school.
4. What advice do you have for us as we develop a high school educational plan?

Participants wrote their responses on 3x5 note cards and went around the circle as each person shared what he/she wrote. The power of this process was the opportunity for all people to speak and truly be listened to as they presented their different perspectives and hopes and dreams for their students and the school district. Not everyone appreciated this process, especially some from the dominant culture. However, a majority felt like their time spent was much more than token feedback and that it would truly make a difference in any plan that was presented. We collected every 3x5 card and published comments verbatim on the website that was created to make the entire process public and transparent. Advisory Committee members then read every comment from every forum before they began creating proposals for the educational plan.

Several proposals were created, and a second round of community forums was held to enable the public to respond to the proposals. Four themes emerged at these forums and became the guiding principles for our work: Unity, Equity, Personalization, and Choice. Taking the themes from the community forums and what they learned about best practices and high school reform, the Advisory Committee recommended three smaller high schools that included the following key components:

- 9th Grade Learning Communities
- Small Learning Communities Based on Themes in Grades 10-12
- Advisory Program for All
- Flexibility to Move Among Themed Academies
- Core Content/State Standards in All Academies
- Multicultural and Anti-Racist Teaching
- Post-Secondary Preparation for All Students
- Improved Access to and Participation in Expanded Extracurricular Opportunities
- Enrollment Based on Choice and Equity
- Secondary Planning Team

Reaching consensus on this educational plan was a long and difficult process. We were constantly asking ourselves, Will this plan truly make a difference for all students, and especially for Alaska Natives and students of color? Issues of equity and racism resulted in some hard and arduous conversations. Based on these conversations, it was agreed that the key component of multicultural and antiracist teaching should remain at the forefront of the educational plan. After the Advisory Committee came to consensus on the proposal for a high school educational plan, it was unanimously approved by the School Board. The Juneau School District is currently working to implement the plan for the fall of 2009. Continuing, we believe that the educational plan that was created has the potential for improving learning for all students in the Juneau community. After working with this process for over a year, we’ve gained the following insights:

- Without addressing issues around equity, significant change in schools will not be possible.
- Protocols and other structured methods of conversation that we have used with educators and students for years can and do work in community settings.
- Protocols and other similar structures help people from different cultures engage in difficult and respectful conversations about race.
- Representative student voice is a perspective in school change that must be valued.
- Change, especially when it is focused on the high school, is difficult. Significant high school change, even when the shortcomings become evident and public, does not happen easily.
- Sharing data is a powerful approach to promoting change; however, one must dig deeply to find data that shows the entire picture.
- The community can and should be a powerful voice in creating significant change in schools. However, any opportunity for input must allow for all of the voices to be heard, not just the most vocal.

For more information on The Next Generation: Our Kids, Our Community, please visit the website www.nextgenerationjuneau.com.

Linda Fiorella and Dave Schmid are members of the Colorado Critical Friends Group and are currently working as educational facilitators. Linda can be reached at lfiorella@gmail.com, and Dave can be reached at dschmid@springsips.com.
munity voice and the best practices in high school reform with a focus on improving learning success for all students. Having used protocols and structures successfully with educators and students, we believed that these same structures for creating conversations would help us find common ground around tough issues with community groups. We were told that previous activities to gather community input had often resulted in only the same few voices being heard, with no follow up, after these meetings. We wanted to make sure that all the voices were heard and would be represented in any plan that was developed. We believed that protocols and similar structures could work to allow people to feel safe and would allow the community to heal the rift that the many years of debate over the need for a new high school had created. We were reminded that this process was not only about building a high school, but a step in changing an entire community and its culture.

During the summer of 2006, a voluntary two-day workshop was held for the high school staff, in which a majority of teachers participated. The focus was on collaboration and learning: how to work together to see what was possible for their school. Protocols were used to help them look at texts on school change, examine student work, and build greater awareness of equity issues within the school. The Futures Protocol led to a powerful discussion of what they believed was needed.

To help the school district build capacity to continue such conversations and promote Critical Friends groups, we facilitated training for district staff during the school year.

A vital component of this process was the formation of a thirty-five member Advisory Committee that was representative of parents, school staff, students, cultural, business, and university representatives, and other community members. The mission of the Advisory Committee was to create a second- ary educational plan that was:

- Dedicated to high expectations and success for all students
- Reflective of the needs, values, and beliefs of the Juneau, Alaska community
- Based on current educational research and best practices
- Supportive of the goals of rigor, relevance, and relationships, and the strategic plan of the Juneau School District

Because our time with the Advisory Committee was limited and the issues so complex, we spent a great deal of time planning sessions to help build a sense of trust within the group and allow us to have the hard conversations. We worked exclusively out of a circle because we wanted to make sure that we distributed the power among all the members of the committee as we symbolically created a sense of community and equity within this group. The community agreements that we developed helped us listen to each other and respect the many different perspectives represented within the group.

We began with the Atlas Looking at Data Protocol. It was a powerful moment as the group began to realize the implications of this data. It became obvious that Alaska Natives and students of poverty were being failed by the current school system. The impact of this data remained with us throughout the entire process and created many opportunities for the group to discuss issues of equity within the school and community. From this data, we were able to discover what communities and people appreciated the use of a protocol that promoted honest conversation and forced us to be more thoughtful.

To achieve our goal of hearing the community’s voice, we scheduled over twenty-five community forums. The forums were scheduled purposely to ensure that all voices in the community be heard, especially those of different cultural groups. We worked hard to make sure that people of color and people representing the dominant culture sat next to each other in the same circles to hear each other’s comments and concerns. All forum participants responded to the following questions:

The New Meaning of Educational Change
A Book Review by Diana Watson, New Hampshire

"Collaboration makes a positive difference only when it is focused on student performance for all and on the associated innovative practices that can make improvement happen for previously disengaged students." (p. 285)

In this fourth edition, Fullan reexamines educational change in light of the growing body of knowledge about the process of change. For change to actually occur, certain factors must be met. Citing numerous research studies, Fullan notes the importance of relationship, meaning and motivation in effective and sustained educational change. Change takes time, and effort, and on-going support. To further understand this, it turns out that an individual must experience some part of the proposed change before understanding what the change really is. By experiencing the change, by achieving success, an individual can come to believe in the change. Fullan argues that belief underlies all action. For successful initiatives involving change, a critical factor is allowing an appropriate amount of time for the people to believe and change. Therefore, according to Fullan, in order for real change to occur in schools, educators must:

1. Believe the proposed change can occur
2. Believe the proposed change makes sense (meaning)
3. Feel they themselves have a meaningful role in it
4. Experience some success with the change

Fullan recommends professional learning communities as a vehicle for providing effective support for teachers (relationships) as they implement changes in practice. While making a compelling case for collaborative practices as a means of supporting improvements in teacher practice, Fullan doesn’t shy away from discussing just how very difficult collaboration has proven to be within schools. He identifies the factors which play against professional learning communities, and provokes the reader to consider, “… we knew specifically and clearly a quarter of a century ago how powerful collaborative or collegial cultures were and how they functioned. Twenty-five years is a long time to sit on information that serves the very moral core of school improvement." (p. 153)

Michael Fullan corroborates what I believe to be true about educational change. He says collaborative practices are the key to sustaining the changes that support student learning. And, he validates these arguments with research.

This book has been at my fingertips for three months. I take it everywhere I go. I keep snatching it up and opening to one of the many sticky notes marked pages to quote a pertinent paragraph. Frankly, I wish I could memorize the entire contents of the book so as to be able to cite it from memory. So often, when I am “selling” the idea of collaborative practices and the work of the National School Reform Faculty, I am asked if there is anything I can give to the administrators or school board to show that the work is effective. I finally have the book! I’ve been looking for: "The New Meaning of Educational Change" fourth edition.

Diana Watson is the Director of Professional Development for the Center for School Success (CSS) in West Lebanon, New Hampshire. CSS is a non-profit organization established in 2003 to address the needs of students who struggle with learning, so they can achieve measurable success in school and in life. You can contact Diana Watson at watson.diana@yahoo.com
In 1998, the School District and community members began advocating for another high school that would help to reduce the size of the current high school, in order to better meet the needs of more students. Not everyone in Juneau agreed with this approach, and it took eight years and seven different votes before the community finally approved another high school. Even after the vote of approval, there remained an air of anger and divisiveness over the building of the new school. The traditions of a one-high-school community remained a strong voice, and any change to move to two high schools was very hard for many people to accept. They feared that this new sports program, as well as the entire tradition of a large comprehensive high school, would be compromised with the building of an additional school. When the bond election finally passed in 2005, the Juneau School District made a bold move; instead of simply planning for the new school, they decided to develop an all-encompassing high school educational plan to address the protracted lack of student success and issues around equity. They realized that to make any significant change, they needed to go public with their data and actually create a process where all members of this diverse community would be heard. At this point, we were hired as facilitators, representing the Colorado Critical Friends Group, because we proposed a process that would utilize structures and protocols to encourage surfaces based on conversations that had been previously used in community meetings. Working with school district leaders, we created a formal process called the Next Generation: Our Kids, Our Community that would include:

- forming an Advisory Committee,
- facilitating community forums, developing a website,
- creating a website and publicizing proposals, and
- submitting a final recommendation for a high school educational plan.

School district leaders realized that they faced several challenges. The community divided, not only on the need for a new high school, but also on the type of changes needed to address their lack of student success. Even some high school staff members were resistant to any type of change. Our challenge was to incorporate com-

Leading the Work by Doing the Work
(continued from page 16)

our work, use essential questions to drive fac-
ulty meetings and collaboratively examine data. Another principal described a more ambitious use of the CFG ideas, “I decided that my approach was to run my faculty meeting as a CFG.”

Two principals depicted two very powerful examples of connections between the TILE CFG and the leadership practice of the district admin-
istrative team. In the first example, one principal explained how a presentation that she made about her CFG work influenced how the district admin-
istrative team functioned. She explained the connec-
tion in this way.

I made a presentation about CFGs to the dis-

(continued on page 18)
were connected to (1) the isolated and fragmented nature of the team; (2) the power of the isolated, competitive culture in which the leaders worked; and (3) the support of the superintendent who, in effect, had ordered the team to be more collaborative. Simply put, the team had a long way to go to become a professional learning community and ordering them to go there, only got them part of the way.

The TILE CFG

The context of the second study is quite different. In this study, 14 graduates of a M.Ed. Leadership program met in a CFG. The group had been trained in a two year, cohort-based M.Ed. program called the TILE program (Teacher Initiative for Leadership in Education) which was very much based on ideas of critical friendship, and used protocols as the central element of its pedagogy. The group was multi-district, regionally based and completed voluntarily.

The TILE CFG has met continuously since fall 2004. Because the group was trained in the use of protocols as part of their leadership education program, they used many more protocols than the district group, facilitated the conversation themselves, had no difficulty bringing dilemmas of practice, student work or relevant tests to the table, and in the third year agreed on a focus of difficult conversations, especially as they related to equity.

In a series of interviews, the members of the group stated that the TILE CFG continued to support the growth of the leadership and their ability to bring this perspective back to their own schools. One principal summed up the experience by saying:

You have to trust in the group. I knew that when I missed CFG meetings, I was really missing something. I think it was the honest, truthful conversations about what we had to do. I don’t always feel I have these in my own district.

Another added:

Another principal described the culture of the CFG and the culture they were trying to build in their schools.

The administrators were also able to provide many examples of their work in response to that, on their engagement, if we hold each other’s feet to the fire and figure out what engages and disengages them. Our CFGs are the only vehicle that I’ve seen that helps us keep the focus on ourselves and our place in this issue. In CFGs we don’t complain about our students or their families, we focus on ourselves and what we can do differently.

Linda Emm is a Curriculum Support Specialist in Miami Dade County Public Schools, working closely with colleague Pedro “Pete” Bermudez and a cadre of both long-time and new NSF trained coaches, to grow the work of CFGs in a variety of contexts.

Can you tell us a little bit about yourself and what drew you to NSF?

Kids are my passion. First I was drawn to children’s theater and then to teaching. I thought teaching high school drama was the one job that would keep me grounded and make me want to come to work each day.

At my middle school my principal got me involved in thinking about learning styles and peer coaching and lots of new ideas about teaching. When I heard about NSF and CFGs it felt like this was the way to focus on the real work, a way to put the big ideas into practice.

By your professional experiences in your district since becoming a coach

I have changed my kids’ lives. Their kids are in schools and what it would take to build bridges across those divisions. We created a performance piece from those conversations and my kids co-facilitated home groups based on their piece at the Winter Meeting in Ft. Lauderdale. I fell and broke my arm the night before the meeting began, but my students carried on without me. It was one of the high points of my career, and the experience of being taken seriously by groups of adults from across the country changed my kids forever.

This challenge turned into a high point when these teachers got their kids’ scores up and presented their work at a recent event organized by their union. How would you describe your current goals and their connection to NSF’s mission?

My goal is the transformation I talked about earlier . . . our kids have to be engaged and we can only focus on that, on their engagement, if we hold each other’s feet to the fire and figure out what engages and disengages them. Our CFGs are the only vehicle that I’ve seen that helps us keep the focus on ourselves and our place in this issue. In CFGs we don’t complain about our students or their families, we focus on ourselves and what we can do differently.

The transformation is bound up with social justice and that’s what got me involved in theater and in education, and it seems like when (continued on page 14)
A
s we prepare to come together for the 12th Annual NSRF Winter Meeting in Tampa Bay, Florida this December, we want to provide you with a brief snapshot of the work of the Florida Center of Activity. We were very fortunate to have gotten an early start with the work of the NSRF in 1995 and by the time funding for NSRF Coaches training ran out, we had built a small cadre of trained coaches working in a cluster of schools. To this day, most of these individuals are still actively engaged in CFT work—work that, in a multitude of ways, has transformed our personal and professional lives.

Like many other “Centers” of Activity, we formed from a network of colleagues who strongly believed in a new way of working and learning together that had not yet been embraced by the prevailing culture of our district. Indeed, some saw us as a band of subversives whose methods were so radical that our true motives had to be suspect. Still, like Jim Collins’ Hedgehog in *Good to Great*, we remained focused on our “one big thing.” With the support of key individuals in the district—our “embedded champions,”—we grew in numbers.

Five years ago, we had the good fortune to meet Don Pemberton, Director of the Lastinger Center of Activity. We were very fortunate to have Dr. Pemberton present at the 11th Annual NSRF Winter Meeting, all of us here at the Florida Center of Activity welcome you to Florida! We know that as we engage each other in thoughtful and challenging conversations, we will all be smarter, stronger, and more courageous than we were when we arrived.

We are especially proud of the fact that we actively seek to work with under-resourced schools and communities. Although Linda and I primarily focus on training coaches and providing follow-up support, the work of the Lastinger Center actively seeks partnerships with organizations that provide a wide array of critical services for the students. For example, our presen-
tant, the Lastinger

such different weather than in Sarasota, the city I had just returned from. One asked what I thought of that city, and I praised the beaches and damit the heat. The second woman asked whether the Mexicans had started creeping in yet, although she sup-
posed they were all over Florida by now. Her question and her tone did not signal that she was crossing a boundary, and my lack of a response did nothing to enlighten her. It was my turn at the cashier, so I was distracted as I said that I was struck by the diversity I saw in the schools—but by then I was blocking another customer and it was awkward to continue to stand in that spot. I waved and left the store.

My skin, not my being, allowed these conversations to happen. The initiators assumed a shared belief and a shared bias based on skin color, not words or actions. These two tiny moments allowed me a small sliver of seeing. Each incident forced me to question the sound of my voice. These two tiny moments allowed me a small sliver of seeing. But in both cases, my assumption based on skin color, not words or actions, was confirmed. Each incident forced me to question the sound of my voice. ers* who benefit from the emotional energy of others, without having to make themselves vulnerable or do the hard work. Conversations do not expend emotional energy. Perhaps I have some personal work to do around this. My truth at this time is I still do not like or appreciate “voyeurs.”

I continue to speak out and I continue to grow and develop new and meaningful alliances across difference. I am particularly proud of the alliances I have forged with the hip-hop generation. Strong, young African-American men and women in their twenties, thirties and forties and I are working collaboratively on several education projects. I continue to speak out and grow as I develop alliances with my white colleagues. I used to feel isolated in my work. Now I feel supported, understood, challenged and respected. Having many strong allies across difference has had a significant impact in my work as a CFG facilitator respected. Having many strong allies across difference has

**Camilla Greene, Pennsylvania**

**Kim Carter, New Hampshire**

When I began the Courageous Conversations book chat, I was cautious about how I constructed my e-mails, worried about inadvertently conveying prejudice and/or naivete, but also intent on communicating my curiosity and wonderings. I felt inept and unable to contribute much of substance, and I found it hard to stay in the conversation. But I had committed to the agreements: to stay engaged, to speak my truth, to experience discomfort, and to expect and accept a lack of closure. And Camilla’s posts pulled me in, drew me on.

I fought being one more white person, and wanted to believe my questions were authentic, meaningful, of value. My experience caused me to question the impact of class, while Singleton, the author of the text, insisted that race was the more powerful oppressor. I didn’t want to be using class as an excuse to not look at race, as Singleton suggested was too often the case, but I found it hard to believe, and so questioned what I was reading.

One of the first profound ahas that began to chip away at the shell of whiteness I lived in was an early perception check in which I realized that my entire life experience was utterly obvious and profoundly common-sensical. And yet, I had so missed it. How was that possible? So much for enlightenment!

When I began the Courageous Conversations book chat, I was eager to participate and fearful of being misunderstood. With only words to communicate, I was cautious about how I constructed my e-mails, worried about inadvertently conveying prejudice and/or naivete, but also intent on communicating my curiosity and wonderings. I felt inept and unable to contribute much of substance, and

Kim Carter, continued
to move toward the world I want to live in, where my being is not taking away from or diminishing another’s but rather contributing to healing and transformation.

Since I entered the book chat, I’ve become more aware and able to interrupt, to raise questions, to hold space, with adults in various contexts. I wrestle mightily with questions of how to do this with an open hand and open heart in situations such as disciplining a child of color; coaching, evaluating or disciplining a staff member of color; or disagreeing with a parent of color. My journey has just begun. My gratitude for my colleagues of color and their willingness to enter into, stay in, and be patient with me as I develop skill through these courageous conversations is immense.

We decided to really walk our talk in schools. It’s like as we say in the theater, “from the page to the stage.” When we added “social justice” to our mission we took it, and it’s here to stay. Since I entered the book chat, I’ve come to think of CFGs as the real thing! We are the model of a learning community, building on talk show host Don Imus’s conversation. I brought the discussion to our school community, building on talk show host Don Imus’s conversation. I brought the discussion to our school community, building on talk show host Don Imus’s conversation.
Leading the Work by Doing the Work
Kim Fahey, Massachusetts

The experience of everyone who has coached or participated in a Critical Friends Groups (CFG) suggests that the support of the school principal is an important factor in implementing and sustaining CFGs. In fact this was one of the findings of the very first study carried out around National Facilitator (Lewis, 2000). This study found that, “Principals who failed to actively support the work of CFGs were the greatest hindrances to their success.” However, as often happens, this study, raised other important questions.

One question was, “How could principals who work in very fragmented, isolated, competitive ways ever learn to value and support the collaborative, reflective, learning-centered work that happens in CFGs?” Two groups of school leaders whose work I have documented have tried a very simple answer to this question: They learned about CFG work by doing it themselves. The District Team was centered on a suburban district’s administrative team (superintendent, assistant superintendent, principals, and directors – 19 members). The superintendent, frustrated by the lack of collaboration and focus in his schools, wanted his leadership team to focus on one suburban school. Surprisingly, in the seventh and last session of the year, the group agreed to continue to meet and to use the Consultancy Protocol to look at their leadership practice.

How could principals who work in very fragmented, isolated, competitive ways ever learn to value and support the collaborative, reflective, learning-centered work that happens in CFGs? They learned about CFG work by doing it themselves.

During the second year, the group stumbled again as it learned the new protocol but by the third session, the feedback was very positive. Comments such as “Working together on a real system issue was good,” “This type of discussion would be great if it could be expanded throughout the system” and “We were able to openly share our ideas and to respectfully listen to each other” were common.

Overall, the study found that over time, the team learned to use the protocols efficiently and productively. The facilitator gave fewer and fewer instructions. The group was increasing their collaborative and reflective. Importantly, the team agreed to both continue the work a second year and five of the school work. Initially, the group struggled with the protocol. However, by the third session, three principals talked about using the Collaborative Assessment Conference in their own schools. Surprisingly, in the seventh and last session of the year, the group agreed to continue to meet and to use the Consultancy Protocol to look at their leadership practice.

Camilla Greene, continued

emotion, I am not able to engage in the conversation in an authentic way. In order to engage in this Courageous Conversation about Race you have to have developed both your cognitive and emotional muscles.

I have enjoyed reading and noting the dawning of new knowledge about race in the consciousness of white people in our online chat. I applauded the courageous white people who have been willing to put themselves out there, making themselves vulnerable on the emotional level. These courageous folks have stopped intellectualizing the topic of race in order to begin to learn how to develop the will, skill, and courage to form alliances across difference in order to interrupt inequities in life and in the classroom. Most white people do not have a clue about what they do not know about race. If you do not live as the constant “other” how can you possibly know the impact of race? Alliance with people who have lived as the racialized “other” are critical if we are to create a new reality for ourselves, and our students.

In the online chat, white people were able to get to a space where they could state what they did not know. It is in the space of being willing to know what we don’t know that we can begin to forge true alliances. I know a lot of white people, but a lot of white people are not my allies. My white allies across difference are folks with whom I have forged a relationship that holds continuous space for Courageous Conversations about Race and other inequities. These conversations have helped me understand how to bring our authentic selves to our conversations. My white allies know how to hold a difficult space to have these conversations, they also know when and how to challenge the belief systems of other white people who have not yet begun to recognize their own white privilege. These white allies engage in conversations with other whites in ways that demonstrate their ability to be self-critical and reflective. White allies speak about and challenge their own long-held beliefs, which allows them to truly see both the impact of historical oppression and the strengths and the needs of their students of color and their colleagues.

One thing I dislike about our online conversations about race is the number of people I refer to as “voyeurs,” people who have signed on but do not speak/write. These “voyeurs” read the online postings filled with emotions and whatever else others have put out there, but do not put themselves out there. I believe these people are “piggy-back”.

These have been long hallmarks of the way I walk through this world. I sobbed for over an hour at this realization. And then I turned to attending to the characteristics of Color Commentary, so I might better understand the dialogue and discourse in which I want to partner. As I read, I replayed in my mind interactions from the Facilitators’ Meeting, including Camilla’s statement that as much as she appreciated what was shared, she could not trust any of us to be there in the future, when the going got tough. And I began to think about the need to begin to turn away from the shadows on the allegorical cave wall and take some first steps to move out of the dark cave, ready to enter a much richer, more multidimensional reality.

I want to live in a different world so badly that my best moves are often less than that. I need to think through the details of the online book discussion and the follow-up interactions I’ve had, that is the action I believe I need to take is both simple and profoundly challenging. I need to be willing to speak, to name what has been unnameable in our culture, to question, to be clumsy and inept and not at all politically correct, I currently believe one of the most important contributions I can make to “bringing wreck” to the inequities and oppressions I have participated in is to continue to bring an ally — to using the privilege of my skin color to hold space for the voices that will help me learn what I need to give over and give up, as well as what I need to embrace, in order

of having that discussion with students and staff, I made a statement that the one black staff member didn’t want to have to represent all people of color, but did want to be an ally in that experience, understanding, and perspective and be in community with us authentically.

Later, I was struck by the arrogance of my statement. I say that, but in reality it was an intellectual realization that while I thought I was operating from the overlapping roles of principal, community leader and discussion moderator, there was a significant probability that I had been classically illustrated white privilege. I made the good choice to apologize to my staff member and myself. When I accept my apology graciously, but didn’t brush it away or deny it, I realized I had unconsciously hoped he would tell me there hadn’t been any problem at all and I shouldn’t worry. I am profoundly grateful for him for his honesty, which helped chisel away another chunk of the white privilege shell I have been encased in. He helped me begin to move past the vague presumptive guilt of being white (which I could deny individually) into a more concrete and personalized awareness of how I contributed in myriad unintentional – and thus mindless – ways to perpetuating white privilege.

At the May Facilitators’ Meeting in Indianapolis, folks from the book took time to meet. That meeting brought me face to face with the transparency of not so much my whiteness as my blandness. I was aware of and felt the subject of invisibility or namelessness. With just over half of our practice reflect our core beliefs and do we work on our high school students well if they have developed the will, skill, and courage to go to the cognitive level about racism, but they have not engaged and cannot engage in courageous conversation on race. I believe that in order to successfully teach each high school student well, we must be the receivers of the role of race on the cognitive level and able to take political, social, psychological and personal actions to interrupt racist thinking and behaviors. Racism has developed in America to a point where it is insidious. The impact of living in a racist country has a harmful effect on our mental, emotional and physical health. That meeting brought me face to face with the transparency of not so much my whiteness as my blandness. I was aware of and felt the subject of invisibility or namelessness. With just over half of our practice.

Using Protocols with Students in a Writing Workshop
Peggy Silva, New Hampshire

I am extraordinarily lucky to work with a small group of student writers every day in a room with schlimply old sofas and Barcaloungers. We operate in exactly the same way my adult writing group has for the past twelve years. We learn some new skills, we read short texts, we give and receive feedback, and sometimes we explore publishing options. Establishing a culture of writing is the most important aspect of this workshop. The first few days are often filled with awkward silences, but my first goal is to have everyone read a piece aloud. We need to hear each other’s writing voices, and I need to protect those fragile new voices from thoughtless or hurtful responses. Toward that end, I can be very vague and blunt, so I spend a lot of time establishing rules of how we will respond to each other, and I underline that I mean rules, not guidelines. My only absolute in this class is that we will follow a very strict protocol of giving feedback. Our goal is to respond to the questions the writer has asked of the work. The control of the feedback requested always rests with the writer. As writers, we do not have to open ourselves to thoughts we do not want to overhear them, and sometimes issue a time-out when I hear something that needs to be restated. In an early session, a student stated that the middle section of a peer’s writing was “boring,” and I asked the group to think about feedback that would be more actionable for the writer. They wrestled with it for a few minutes, and then were able to say that as readers the first few sentences provided good introduction and they were satisfied with it, but wondered whether it needed more exposition—a wider lens. I wondered whether the writing flowed, or whether they had questions as they read. I wondered whether the title worked. A friend had told me he didn’t “get” the title. For this first round, I facilitated my own session, although we eventually asked for someone else to facilitate for us. I asked for fifteen minutes of time.

My students liked that I had not taken much time to get to the meat of the story. They thought the title hooked the reader. They disagreed as to whether to widen the lens and to spend more time on my conclusion. They asked me to put in a couple of words that cemented the concept of place, and they wondered if I should—and then they criticized whether they realized they had used that dreaded word—and the assumption that all Whites were members of the same club, and they wanted the word “club” to appear with quotation marks. When they finished I told them that I had held my breath as they read because I had never written anything like this piece and I wondered what readers would think of me as they read. Their reading and discussion helped me learn from my own writing. I talked about someone using the word “should.” We talked about a simple change in phrasing, something like asking if I had consid-

White Privilege DNA
Peggy Silva, New Hampshire

I thought I knew what I didn’t know. In discussions about issues of race and equity, I put my disclaimer out on the table—as a white, upper-middle class teacher who lives in a Brigadoon of privilege, I am uber-aware of all that doesn’t touch me in my daily teaching life. Or so I thought. Recently, however, I have been made aware of a starting gate I didn’t even know I occupied. I am a white woman—and that one fact allows others to assume the DNA of my beliefs. No other markers are needed.

I entered a small mall food court restaurant at the same time as another woman. The hostess sat us at adjoining tables and the other woman asked me to keep an eye on her shopping bags while she used the restroom. When she returned we fell into that idle conversation of strangers. She was visiting her second home in Florida, here from Dallas for a few days of shopping and sailing. I was visiting Sarasota as a school consultant. Her sister was an educator, she said, and had recently returned to a middle school classroom. Her sister’s story, she said, finally had a happy ending. She had once been the head of a strong federal pre-school program in the Southwest, but the Blacks had wanted the position for themselves, and had made her life hell—using her left and right for things like supposedly not saying “good morning” as she passed them in the hall. Finally, she quit and let them have the job.

I had sent no signals that we were of the same mind. We were in a mall food court. I had on jeans shorts and a plain white tee shirt. The only thing we had in common at that moment was our gender. She was sitting at the table, and I was sitting side by side and that we were both white. We had said nothing as a prologue to her story. We were two strangers at a “pass the salt” level of conversation. I said nothing. When she used the restroom, the hostess sat us at adjoining tables and the other woman asked me to keep an eye on her shopping bags while she used the restroom. When she returned we fell into that idle conversation of strangers. She was visiting her second home in Florida, here from Dallas for a few days of shopping and sailing. I was visiting Sarasota as a school consultant. Her sister was an educator, she said, and had recently returned to a middle school classroom. Her sister’s story, she said, finally had a happy ending. Finally, she quit and let them have the job.

Fast forward to the check-out counter of my local market. Two acquaintances and I were praising the day—a glorious end of summer afternoon. I remarked that it was

I am extraordinarily lucky to work with a small group of student writers every day in a room with schlumpdy old sofas and Barcaloungers. We operate in exactly the same way my adult writing group has for the past twelve years. We learn some new skills, we read short texts, we give and receive feedback, and sometimes we explore publishing options. Establishing a culture of writing is the most important aspect of this workshop. The first few days are often filled with awkward silences, but my first goal is to have everyone read a piece aloud. We need to hear each other’s writing voices, and I need to protect those fragile new voices from thoughtless or hurtful responses. I try to be very vague and very blunt, so I spend a lot of time establishing rules of how we will respond to each other, and I underlie that I mean rules, not guidelines. My only absolute in this class is that we will follow a very strict protocol of giving feedback. My goal is to respond to the questions the writer has asked of the work. The control of the feedback requested always rests with the writer. As writers, we do not have to open ourselves to thoughts we do not have to hear.

To understand how we will respond to each other’s writing, we read the Feedback Principles published by NSRF. We talk about the best and worst feedback we have ever received. I talk about how deeply a thoughtless comment can influence someone by telling the story of my younger sister’s fourth grade teacher commenting that my sister would never go to college with her math skills. My sister was ten years old, but she listened hard to that teacher and never even registered a college course until she had turned forty and was weary of dead-end jobs. That story resonates with my students, as we all have someone’s thoughtless comment buried inside us.

We read Liz Lurman’s wonderful piece, “Towards a Process for Critical Response,” and we talk about the care that artists need when learning from their work. And finally, we are ready to offer feedback to each other. I begin this phase of the workshop by sharing a piece of writing of my own. Sometimes it is a finished piece, sometimes a work in progress, sometimes an idea. It is hard to ask students initially to help me with an idea I am wrestling with because their inclination is to offer a lot of “shoulds,” a word I never want to hear in our writing circle. When I shared my newest essay, “White Privilege DNA” (see sidebar), I told them that it was a third draft, that I was pretty satisfied with it, but wondered whether it needed more exposition—a wider lens. I wondered whether the writing flowed, or whether they had questions as they read. I wondered whether the title worked. A friend had told me he didn’t “get” the title. For this first round, I facilitated my own session, although we eventually ask for someone to help us.

We started introducing the concept of white privilege as a club. That took away the “should” and pushed my thinking, and that subtle shift made a difference in the way I heard the feedback. After modeling a feedback session, I turn them loose to listen to each other in small groups. I do not join these groups, but I want my teachers to listen to each other’s writing voices to interrelate with their own learning. I reserve the right to overhear them, and sometimes issue a time-out when I hear something that needs to be restated. In an early session, a student stated that the middle section of a peer’s writing was “boring,” and I asked the group to think about feedback that would be more actionable for the writer. They wrestled with it for a few minutes, and then were able to say that as readers the first few sentences provided good information and they were (continued on page 15)

I lister’s I expressed my opinion on the film Freedom Writers. My opinion was in opposition to the glorifying praise online. The push-back and feedback were interesting and very telling. I was able to hear what I was saying and not deny or try to sugar-coat it.

Most dominant culture folks are not aware of the impact of race and historical oppression on African-Americans. Let me restate that . . . per- haps most dominant culture people are aware on a cognitive level about racism, but they have not developed the will, skill, and courage to go to the emotional space to work through and challenge their own long-held beliefs so that they can decon- struct racism. The more I have lived in the world of other people of color, the more I am aware that they are educated. In my belief systems and are played out in their lives and in their classrooms. I believe educators in America cannot teach high school students well if they have not engaged and cannot engage in courageous conversation on race. I believe that in order to suc- cessfully teach every high school student well, we must be the recipients of the role of race on the cognitive level and able to take political, social, psychological and personal actions to interrupt rac- ist thinking and behaviors. Racism has developed in America to a point where it is insidious. The impact of living in a racist country has a harmful effect on us, on me, and on the high school student we are educating.

Glenn Singleton and Curtis Linton, in their book Courageous Conversations about Race: A Field Guide for Achieving Equity in Schools, have outlined a way for educators to engage in a series of reflective, collaborative, courageous conversa- tions. In the last six months, fifty-three of us in NSRF have engaged in Courageous Conversations about Race Online. Of the four guidelines for the concept of courageous conversation, “experi- ence discomfort” is the one guideline that jump- starts and holds the courage in the conversation. My experience in having conversations about race is that there is the tension of not wanting to be white or have an unconscious person of color, who will rush to make white people comfortable whenever the conversa- tion gets to the core of the work. I have been an emotionally charged subject for me. I cannot promise that I will always speak in the comfort zone when I am hav- ing a conversation about race across difference. If I have to edit what I say, and tone down the

Leading the Work by Doing the Work
Kevin Fahey, Massachusetts

The experience of everyone who has coached or participated in a Critical Friends Groups (CFG) suggests that the support of the school principal is an important factor in implementing and sustaining CFGs. In fact this was one of the findings of the very first study carried out around No Child Left Behind (Dunne, Nave, & Lewis, 2000). This study found that, “Principals who failed to actively support the work of CFGs were the greatest hindrances to their success.” However, as often happens, this study, raised other important questions.

One question was, “How could principals who work in very fragmented, isolated, competitive ways ever learn to work in concert and support the collaborative, reflective, learning-centered work that happens in CFGs?” Two groups of school leaders whose work I have documented have tried a very simple answer to this question: They learned about CFG work by doing it themselves.

The District Team
The first study focused on one suburban district’s administrative team (superintendents, assistant superintendents, principals, and directors – 19 members). The superintendent, frustrated by the lack of collaboration and focus on issues of teaching and learning on the administrative level, convened the team for a monthly CFG-like group. The group used the Collaborative Assessment Conference as a vehicle to look at student work, raise issues of teaching and learning, and get feedback. There was no facilitator and my documentation of the sessions filled with emotions and whatever else others and some members began the work in their own schools. An administration of the Team Learning Survey (Dechant & Marsick) at the end of the year, the group agreed to continue to meet and to use the Consultancy Protocol to look at their leadership practice.

During the second year, the group stumbled again as it learned the new protocol but by the third session, the feedback was very positive. Comments such as “Working together on a real system issue was good,” “This type of discussion would be great if it could be expanded throughout the system” and “We were able to openly share ideas and to respectfully listen to each other” were common.

Overall, the study found that over time, the team learned to use the protocols efficiently and productively, the facilitator gave fewer and fewer instructions, and the group learned to use the protocols efficiently and productively. The group agreed to continue to develop their capacity to work collaboratively and reflectively.

The second study focused on one suburban district’s administrative team. The superintendent, frustrated by the lack of collaboration and focus on issues of teaching and learning on the administrative level, convened a monthly CFG-like group. The group used the Collaborative Assessment Conference as a vehicle to look at student work, raise issues of teaching and learning, and get feedback. An administration of the Team Learning Survey (Dechant & Marsick) at the end of the year, the group agreed to continue to meet and to use the Consultancy Protocol to look at their leadership practice.

How could principals who work in very fragmented, isolated, competitive ways ever learn to value and support the collaborative, reflective, learning-centered work that happens in CFGs? They learned about CFG work by doing it themselves.

Camilla Greene, continued

emotion, I am not able to engage in the conversation in an authentic way. In order to engage in this Courageous Conversation about Race you have to have developed both your cognitive and emotional muscles.

I have enjoyed reading and noting the dawning of new life in our race culture in the consciousness of white people in our online chat. I applaud the courageous white people who have been willing to put themselves out there, making themselves vulnerable on the emotional level. These courageous folks have stopped intellectualizing the topic of race in order to begin to learn how to develop the will, skill, and courage to transform alliances across difference in order to interrupt inequities in life and in the classroom. Most white people do not have a clue about what they do not know about race. If you do not live as the constant “other” how can you possibly know the impact of race? Alliance with people who have lived as the racialized “other” are critical if we are to create a reality authentically for ourselves, and our students. In the online chat, white people were able to get to a space where they could state what they did not know. It is in the space of being willing to know what we don’t know that we can begin to forge true alliances. I know a lot of white people, but a lot of white people are not my allies. My white allies across difference are folks with whom I have forged a relationship that holds continuous space for Courageous Conversations about Race and other issues. I also know how to bring our authentic selves to our conversations. My white allies know how to hold a difficult space to have these conversations. These white allies engage in conversations with other whites in ways that demonstrate their ability to be self-critical and reflective. White allies speak about and challenge their own long- held beliefs about race which allows them to truly see both the impact of historical oppression and the strengths and the needs of their students of color and the students of all colors.

One thing I dislike about our online conversation about race is the number of people I refer to as “white people,” people who have signed on but do not speak/write. These “white people” read the online postings filled with emotions and whatever else others have put out there, but do not put themselves out there. I believe these folks are “piggy-back” (continued on page 14)

Kim Carter, continued

tied is a vast understatement. The degree to which Singleton’s depiction of White Talk articulated my engagement in the previous three or so months of conversation about race was so strong that it resonated with any ethnic or cultural traditions, these characteristics sum up my heritage from my upbringing, and they are the qualities that I bring to “the cultural parameters” of dominance in racial discourse today in the United States.

• My compulsion to find just the right words to ensure understanding;
• My use of examples from the lives of people I know who, for me, embody the traits I bring to the table;
• My reliance on “the research” and the statistics;
• My desire to find the right action to make things better.

These have been long hallmarks of the way I walk through this world, I sobbed for over an hour at this realization. And then I turned to attending to the characteristics of Color Commentary, so I might better understand the dialogue and discourse in which I want to partner. As I read, I replayed in my mind interactions from the Facilitators’ Meeting, including Camilla’s statement that as much as she appreciated what was shared, she could not trust any of us to be there in the future, when the going got rough. And I began to wonder if my own reluctance to push for a different, more multitudinational reality.

I want to live in a different world so badly that my conversations are filled with anger, sadness, and frustration. As I read the online book discussion and the follow-up interactions I’ve had, is that the action I believe I need to take is both simple and profoundly challenging, I need to be able to speak, to name what has been unnameable in our culture, to question, to be clumsy and inept and not at all politically correct. I currently believe one of the most important contributions I can make to “bringing wreck” to the inequities and oppressions I have participated in is to commit to being an ally – to using the privilege of my skin color to hold space for the voices that will help me learn what I need to give over and give up, as well as what I need to embrace, in order
Kim Carter, continued

to move toward the world I want to live in, where my being is not taking away from or diminishing another’s but rather contributing to healing and transformation.

Since I entered the book chat, I’ve become more aware and able to interrupt, to raise questions, to hold space, with adults in various contexts. I wrestle mightily with questions of how to do this with an open hand and open heart in situations such as disciplining a child of color; coaching, evaluating or disciplining a staff member of color; or disagreeing with a parent or a colleague. My journey has just begun. My gratitude for my colleagues of color and their willingness to enter into, stay in, and be patient with me as I develop skill through these courageous conversations is immense.

Kim Carter may be reached at k.carter@delpheia.net

Camilla Greene, Pennsylvania

De veloping the will, skill and courage to engage in difficult conversations is a luxury. As an African-American female, developing the will, skill and courage were part of my birthright. The America I inhabit is a racialized society. The stories of my childhood are stories of indignities and inequities suffered by people who look like me, in my family, in my community, in America. Those stories, both historical and current, those visual pictures both historical and current that I read in the mainstream and black press media, coupled with my life experiences, prepared me to be courageous. One thing I figured out early on was that I was a proud and unapologetically black child. I did not want to assimilate and become an unconscious black person. There were examples of family and friends who used their courageous voices to speak out about injustice. In order to survive with my self-intact, I had to speak out. I developed my voice in high school and I have continued on my journey strengthening my will, skill, and courage to interrupt and challenge inequities whenever and wherever they occur. Each time I speak out I get stronger and more courageous.

I have also had a geographical advantage. Growing up in Brooklyn and attending a progressive school, I was surrounded by dominant culture, Latino and African-American people who did not shy away from confrontation. We had many a strong, courageous conversation on race.

Outside of Brooklyn and my progressive school I learned that when I bring my authentic self to dominant culture folks unaccustomed to having their long-held beliefs challenged by someone who does not look like them, the push-back and fallout have been very interesting, hurtful and sometimes problematic. More recently, on the NSRF (continued on page 12)

Camilla Greene, continued

As we prepare to come together for the 12th Annual NSRF Winter Meeting in Tampa Bay, Florida this December, we want to provide you with a brief snapshot of the work of the Florida Center of Activity. We were very fortunate to have gotten an early start with the work of the NSRF in 1995 and by the time funding for NSRF Coaches training ran out, we had built a small cadre of trained coaches working in a cluster of schools. To this day, most of these individuals are still actively engaged in CFG work—work that, in a multitude of ways, has transformed our personal and professional lives.

Like many other “Centers” of Activity, we formed from a network of colleagues who strongly believed in a new way of working and learning that had not yet been embraced by the prevailing culture of our district. Indeed, some saw us as a band of subversives whose methods were so radical that our true motives had to be suspect. Still, like Jim Collins’ Hedgehog in Good to Great, we remained focused on our “one big thing.” With the support of key individuals in the district—our “embedded champions,”—we grew in numbers.

Five years ago, we had the good fortune to meet Don Pemberton, Director of the Lastinger Communities CFG Coaches Institute. After sharing our dreams and comparing notes, we soon realized that our work had much in common. The Lastinger Center, the NSRF Center of Activity in Florida, is currently working in 39 schools in 5 different districts (Alachua, Collier, Duval, Miami-Dade and Pinellas). We have about eleven university faculty and doctoral students, along with a growing number of NSRF National Facilitators and school-level coaches, working with us in our center. We have 3 levels of measurement to assess center effectiveness (internal team, external team, and grant-sponsored evaluation) which will help us to determine the impact of our work on teachers, schools, principals, and of course STUDENT ACHIEVEMENT. Preliminary research results indicate that our Lastinger Schools, when compared with matched control group schools, show significant differences in student achievement scores on Florida’s Comprehensive Assessment Test (FCAT) in math and reading.

We are especially proud of the fact that we actively seek to work with under-resourced schools and communities. Although Linda and I primarily focus on training coaches and providing follow-up support, the work of the Lastinger Center actively seeks partnerships with organizations that provide a wide array of critical services for the students. For example, on a recent visit, the Lastinger Coaches and other staff members went to Immokalee, a city where many of the students in the surrounding schools are from Immokalee, a city that has the lowest average income (under $20,000) in the nation. We were especially proud that we were the first NSRF Center that worked in Immokalee.

Using Protocols with Students. . .

We are ready to move on. As readers, they did not need the second and third paragraphs of this piece to understand the writer’s point of view. They could see immediately that that was more helpful to the writer than the word “ boring.” After the first two weeks of Writing Workshop, my presence as teacher fades as we engage each other in thoughtful and challenging conversations. We will all be smarter, stronger, and more courageous than we were when we arrived. .

Peggy Silva can be reached at psilva@spri.se.com

For more information about the work of the NSRF Florida Center of Activity, visit www.coe.ufl.edu/centers/lastinger/index.html. Pedro Bermudez may be contacted at pedro.bermudez@dadadesk.net, and Linda Emm at llemm@dadadesk.net.
were connected to (1) the isolated and fragmented nature of the team; (2) the power of the isolated, competitive culture in which the leaders worked; and (3) the superintendent who, in effect, had ordered the team to be more collaborative. Simply put, the team had a long way to go to become a professional learning community and ordering them to go there, only got them part of the way.

The TILE CFG
The context of the second study is quite different. In this study, 14 graduates of M.Ed. Leadership program met in a CFG. The group had been trained in a two year, cohort-based M.Ed. program called the TILE program (Teacher Initiative for Leadership in Education) which was very much based on ideas of critical friendship, and used protocols as the central element of its pedagogy. The group was multi-district, regionally based and completed voluntarily.

The TILE CFG has met continuously since fall 2004. Because the group was trained in the use of protocols as part of their leadership education program, they used many more protocols than the district group, facilitated the conversation themselves, had no difficulty bringing dilemmas of practice, student work or relevant texts to the table, and in the third year agreed on a focus of difficult conversations, especially as they related to equity.

In a series of interviews, the members of the group stated that the TILE CFG continued to support their own leadership learning and their ability to bring this perspective back to their own schools. One principal summed up the experience by saying, “But you learn. You have to do it. But I am not always feeling I have these in my own district. I don’t always feel I have these in my own district.

One principal spoke about the challenges that the TILE CFG faced and described the workplace as one that was competitive and where the leaders were “alone.” In this study, 14 graduates of a M.Ed. program called the TILE program (Teacher Initiative for Leadership in Education) which was very much based on ideas of critical friendship, and used protocols as the central element of its pedagogy. The group was multi-district, regionally based and completed voluntarily.

In this study, 14 graduates of a M.Ed. Leadership program met in a CFG. The group had been trained in a two year, cohort-based M.Ed. program called the TILE program (Teacher Initiative for Leadership in Education) which was very much based on ideas of critical friendship, and used protocols as the central element of its pedagogy. The group was multi-district, regionally based and completed voluntarily.

In the interviews, every group member gave numerous examples of how their participation in the TILE CFG sustained and informed their leadership practice. The examples fell into three broad areas. First, members shared how the TILE CFG continually refocused them on larger issues of school culture and professional community, encouraging them to look beyond the immediate problems that they faced as school leaders. Second, the principals described specific structures, tools or practices that were used in the TILE CFG, tools that they also used, in some way, in their schools. Finally, three members of the group from the same district recounted the effect that having TILE CFG colleagues in their district had on the work of the district administrative team.

One principal, for example, described how the TILE CFG supported her persistent focus on teaching and learning by saying, “Are kids learning or are we just teaching?” Another noted, “It is about always bringing the conversation to the student and learning.”

At my middle school my principal got involved in thinking about teaching and peer coaching and lots of new ideas about teaching. When I heard about NSRF and CFGs I felt like this was the way to focus on the real work, a way to put the big ideas into practice.

You’ve played a few different roles in your district since becoming a coach. For the first ten years I did dou...
In 1998, the Juneau School District and community members began advocating for another high school that would help to reduce the size of the current high school, in order to better meet the needs of more students. Not everyone in Juneau agreed with this approach, and it took eight years and seven different votes before the community finally approved another high school. Even after the vote of approval, there remained an air of anger and divisiveness over the building of the new school. The traditions of a one-high-school community remained a strong voice, and any change to move to two high schools was very hard for many people to accept. They feared that their strong sports program, as well as the entire tradition of a large comprehensive high school, would be compromised with the building of an additional school.

When the bond election finally passed in 2005, the Juneau School District made a bold move; instead of simply planning for the new school, they decided to develop an all-encompassing high school educational plan to address the protracted lack of student success and issues around equity. They realized that to make any significant change, they needed to go public with their data and actually create a process where all members of this diverse community would be heard. At this point, we were hired as facilitators, representing the Colorado Critical Friends Group, because we proposed a process that would utilize structures and protocols to create surfaced conversations that had been previously used in community meetings. Working with school district leaders, we facilitated a formal process called the Next Generation: Our Kids, Our Community that would include:

- forming an Advisory Committee,
- facilitating community forums,
- developing a website,
- creating and publishing proposals, and
- submitting a final recommendation for a high school educational plan.

School district leaders realized that they faced several challenges. The community divided, not only on the need for a new high school, but also on the type of changes needed to address their lack of student success. Even some high school staff members were resistant to any type of change. Our challenge was to incorporate com-

(continued on page 18)
Collaboration makes a positive difference only when it is focused on student performance for all and on the associated innovative practices that can make improvement happen for previously disengaged students.” (p. 285)

In this fourth edition, Fullan reexamines educational change in light of the growing body of knowledge about the process of change. For change to actually occur, certain factors must be met. Citing numerous research studies, Fullan notes the importance of relationship, meaning and motivation in effective and sustained educational change. Change takes time, and effort, and on-going support. To further emphasize this point, it turns out that an individual must experience some part of the proposed change before understanding what the change really is. By experiencing the change, by achieving success, an individual can come to believe in the change. Fullan argues that belief underlies all action. For successful initiatives involving change, a critical factor is allowing an appropriate amount of time for the people to believe in the change. Therefore, according to Fullan, in order for real change to occur in schools, educators must:

1. Believe the proposed change can occur
2. Believe the proposed change makes sense (meaning)
3. Feel they themselves have a meaningful role in it
4. Experience some success with the change

Fullan recommends professional learning communities as a vehicle for providing effective support for teachers (relationships) as they implement changes in practice. While making a compelling case for collaborative practices as a means of supporting improvements in teacher practice, Fullan doesn’t shy away from discussing just how very difficult collaboration has proven to be within schools. He identifies the factors which play against professional learning communities, and provokes the reader to consider, “...we knew specifically and clearly a quarter of a century ago how powerful collaborative or collegial cultures were and how they functioned. Twenty-five years is a long time to sit on knowledge that serves the very moral core of school improvement.” (p. 153)

Michael Fullan corroborates what I believe is true about educational change. He says collaborative practices are the key to sustaining the changes that support student learning. And, he validates these arguments with research. This book has been at my fingertips for three months. I take it everywhere I go. I keep snatching it up and opening to one of the many sticky note marked pages to quote a pertinent paragraph. Frankly, I wish I could memorize the entire contents of the book so as to be able to cite it from memory. So often, when I am “selling” the idea of collaborative practices and the work of the National School Reform Faculty, I am asked if there is anything I can give to the administrators or school board to show that the work is effective. I finally have the tool I’ve been looking for: The New Meaning of Educational Change, fourth edition.

The New Meaning of Educational Change
Fourth Edition, by Michael Fullan
Teachers College Press, 2007

Diana Watson is the Director of Professional Development for the Center for School Success (CSS) in West Lebanon, New Hampshire. CSS is a non-profit organization established in 2003 to address the needs of students who struggle with learning, so they can achieve measurable success in school and in life. You can contact Diana Watson at watson.diana@yahoo.com
In This Issue
Debbie Bambino, Pennsylvania

I n this issue of Connections, our director, Steven Strull, shares news of our recent Centers’ Summit and the launch of our new Accountability Council in his report. As we take steps toward long-term sustainabil-
ity, we are making the road of our mission by walking it together. Read Steven’s analysis of proposed standards for national facilitators that grow out of what we “do” and what we “know” about our work in sup-
port of students.

Pedro Bermudez and Linda Emm, two of our Southern Florida hosts for this year’s Winter Meeting, bring us up to date on the state of their work in their Center’s report and welcome us to their state. In addi-
tion, in our Living History feature, Linda shares her history as a coach and her hopes and fears about the future of our work.

This issue’s Students at the Center finds Peggy Silva from Southern High sharing her writing and soliciting student feedback around a recent experience of her own: privileging White Privilege DNA. Kevin Fahey, our Research Director, shares the story of two research studies about the initiation and impact of CFGs for administrators, raising still more questions about the ways we structure interventions and reforms.

Kim Carter and Camilla Greene offer us an eye on their individual experiences occurring in tandem, as colleagues across difference engaged in the ongo-
ing online book chat about the text Courageous Conversations about Race by Glenn Singleton and Curtis Linton.

Diana Watson shares her perspective about the book “she keeps returning to,” in her review of The New Meaning of Educational Change by Michael Fullan.

Finally, Dave Schmid and Linda Fiorella offer us a glimpse of the power of the circle and their use of protocols and collaborative structures in support of the Juneau community’s struggle to confront educational inequities and design new high schools that are student-centered. In their Protocols in Practice piece, The Power of the Circle in Community Conversations about Equity.

Connections is a journal of the National School Reform Faculty, a division of Harmony Education Center. Published three times per year, it provides a forum for CFG Coaches and other reflective educa-
tors to share their practice.

Editorial Board: Debbie Bambino, Sarah Childers, Camilla Greene and Greg Peters

If you have any feedback or are interested in contributing to Connections, contact us at 812.330.2702 or dbambino@earthlink.net

1. Describe the learning environment in a high school that you do not want to see.
2. Describe the learning environment in a high school that you want to see.
3. Describe your student when he/she graduates from high school.
4. What advice do you have for us as we develop a high school educational plan?

Participants wrote their responses on 3x5 note cards and went around the circle as each person shared what he/she wrote. The power of this process was the opportunity for all people to speak and truly be listened to as they presented their different per-
spectives and hopes and dreams for their students and the school district. Not everyone appreciated this process, especially some from the dominant culture. However, a majority felt like their time spent was much more than token feedback and that it would truly make a difference in any plan that was pre-
sented. We collected every 3x5 card and published comments verbatim on the website that was created to make the entire process public and transparent. Advisory Committee members then read every com-
ment from every forum before they began creating proposals for the educational plan.

Several proposals were created, and a sec-
ond round of community forums was held to enable the public to respond to the proposals. Four themes emerged at these forums and became the guiding principles for our work: Unity, Equity, Personalization, and Choice. Taking the themes from the community forums and what they learned about best practices and high school reform, the Advisory Committee recommended three smaller high schools that included the following key components:

- 9th Grade Learning Communities
- Small Learning Communities Based on Themes in Grades 10-12
- Advisory Program for All
- Flexibility to Move Among Themed Academies
- Core Content/State Standards in All Academies
- Multicultural and Anti-Racist Teaching
- Post-Secondary Preparation for All Students
- Improved Access to and Participation in Expanded Extracurricular Opportunities
- Enrollment Based on Choice and Equity
- Secondary Planning Team

Reaching consensus on this educational plan was a long and difficult process. We were con-
stantly asking ourselves, Will this plan truly make a difference for all students, and especially for Alaska Natives and students of color? Will issues of equity and racism result in some hard and arduous conversations. Based on these con-
versations it was agreed that the key component of multiculturality and anti-racism teaching should remain at the forefront of the educational plan. After the Advisory Committee came to consensus on the proposal for a high school educational plan, it was unanimously approved by the School Board. The Juneau School District is currently working to imple-
ment the plan for the fall of 2009. Continuing.

We believe that the educational plan that was created has the potential for improving learning for all students in the Juneau community. After working with this process for over a year, we’ve gained the following insights:

- Without addressing issues around equity, significant change in schools will not be possible.
- Protocols and other structured methods of con-
versation that we have used with educators and students for years can and do work in commu-

- Protocols and other similar structures help people from different cultures engage in difficult and respectful conversations about race.
- Representative student voice is a perspective in school change that must be valued.
- Change, especially when it is focused on the high school, is difficult. Significant high school change, even when the shortcomings become evident and public, does not happen easily.
- Sharing data is a powerful approach to promot-
ing change; however, one must dig deeply to find data that shows the entire picture.
- The community can and should be a powerful voice in creating significant change in schools. However, any opportunity for input must allow for all the voices to be heard, not just the most vocal.

Linda Fiorella and Dave Schmid are members of the Colorado Critical Friends Group and are cur-
rently working as educational facilitators. Linda can be reached at lifiorella@gmail.com, and Dave can be reached at dschmid@springsips.com.

(continued from page 18)
The room was very familiar; the scene predictable – we’d been there before but had never been there. A group of NSRF National Facilitators were working, eating, talking, and planning, in critical friendship. We were in Atlanta at the recent Center of Activity Summit, but we could have been anywhere and the thirty or so assembled National Facilitators could have been a very different bunch. But we were there, in Atlanta, to once again take up the conversation of standards and guidelines for National Facilitators, and this time we made real progress.

We met for a day and a half following up on a day-long Accountability Council (AC) meeting where we had gained some clarity around the purposes of our standards – we did not concern ourselves with the technicalities of this or that standard, nor how it would be measured or even what the metrics would be. Instead, from the AC meeting through the summit, we crafted our work in terms of what National Facilitators DO and therefore what they KNOW, as a result of NSRF’s work. We were also very clear in our process – we were not deciding anything; we were working together to clarify our thinking and to propose direction to the National Center as we continue to hone our language and articulate our practice.

We have pages and pages of notes, dutifully typed up by work-study students who know little of our work. We have lots of ideas and we emerged from the summit with five broad themes – standards – to guide us as we continue to tune our language as we begin a process for public review of each National Facilitator’s practice. I offer a reflection on each of the proposed standards, not as definitive, but as representative of the deliberations we are considering as we continue our journey as a national organization.

Standard #1 – Skills: I believe this standard begins to address the basic question, what do National Facilitators DO and therefore what do they KNOW? This question turns the typical educational question of what children should know and be able to do on its head, and is borrowed from the essential question asked by Big Picture Company schools. It assumes National Facilitators have some practice in common, that we do certain things – not necessarily particularly – but in general and that as a result of our collective doing we are amassing a knowledge base that is identifiable, reportable, and replicable. Collectively, we generously throw around the best practices language, but in our case, over the years, we have individually and collectively honed our practice toward being able to collectively know. We know about our practice, what works and what doesn’t, how it gets received and why, and in the end, we share a deep belief that to improve student learning and achievement we must learn together as adults. We agree that it takes certain skills, though varied, to do our work and that we can and should articulate those skills as we seek feedback on our practice.

Standard #2 – Addressing Issues Related to Equity: Our mission statement says that as an organization we have a commitment to fostering educational and social equity. Those of us who were around for the crafting of this language years ago remember the honest and sometimes tough conversations we had about including this statement in our mission. Over the years we have struggled with the construct of equity.
